

Video Command Center Entertainment Series

VCC -E (Entertainment)

The VCC-E(Entertainment) series are the latest member in the Avitech family of multi-image display products. It is suited for home entertainment, restaurants and sports bars that would like to display component HD sources such as from satellite set-top boxes along with computer generated signals and traditional analog video sources.

In addition to standalone modules, the VCC Entertainment series can also be used in a cable/satellite head-end where multiple channels of HD contents needs to be monitored. The Entertainment series can be part of the MCC virtual monitor wall system.

Video

There are four models for the VCC Entertainment series. Each module can take anywhere from 1 to 2 component HD inputs and up to 2 analog video input. RGBHV and DVI inputs are also available. Standalone modules or can be cascaded to accommodate more inputs.

Communication

There are two different communication protocols available for the VCC. If you are specifying a system with an Avitech controller, both COM A and COM B will come equipped with RS-485. COM B is used for cascading with other modules.

Key Features

- Displays 2 to 60 inputs on a single display
- Can be part of the Avitech Virtual Monitor Wall System
- Inputs can be RGBHV, Component HD, analog composite, YC, Y, Cb, Cr
- Simultaneous high resolution DVI and RGBHV output
- Output resolution can be 800x600 to 1600 x 1200

Ordering Information

VCC2vHD1

Accepts 1 Component HD inputs and 1 computer Input (DVI/RGB up to 1600x1200)

VCC2vHD2

VCC-2vHD2 - Entertainment Module - Accepts 2 Component HD inputs

VCC4cHD1

VCC-4cHD1 - Entertainment Module - Accepts 1 Component HD input, 1 computer inputs (DVI/RGB up to 1600x1200) 2 video inputs (analog composite, YC, Y Cb Cr)

VCC4cHD2

VCC-4cHD2 - Entertainment Module - Accepts 2 Component HD input, 2 video inputs (analog composite, YC, Y Cb Cr)
